

Leica Captivate: Height Transfer Setup

1	<p>The Height Transfer setup within Leica Captivate allows you to easily calculate a new height for the station you have set up over.</p> <p>Set up your TS over a known point without a known height but with a view of a reference point/s which have heights</p>	
2	<p>From the home screen head into the Setup application and select Transfer height as your option.</p> <p>Press Next</p>	
3	<p>Choose the Job from which you are drawing your setup information followed by the point ID of the station you are occupying.</p> <p>Then select OK</p>	
4	<p>Select the point you want to use as your height reference.</p> <p>Aim at that point then select Measure.</p>

<p>5</p>	<p>You can at this point add more reference points to your setup. It is not necessary but would act as a check to your calculation.</p> <p>If you are satisfied press F5 Calculate</p>	
<p>6</p>	<p>The results page will give you details on the setup. It shows you the old height from your point, the new point as well as the difference and the quality of the setup.</p> <p>If you're happy press F1 Set to complete the setup</p>
