Scan the QR code on your smart device to view our website, where you can view the latest information on our products and services.

## COMPREHENSIVE RANGE

We offer a market leading range of Temporary Fencing, Internal and External Site Hoarding, Barriers and Traffic Management Systems.

## HIRE OR SALE

Our range is available on a hire or purchase basis.

## LOCALLY BASED STAFF

Our locally based staff provide in depth knowledge and assistance on our entire range.

## DISTRIBUTION

Our strategically placed distribution depots provide a true nationwide service.

## EXCELLENT STOCK AND RAPID DELIVERY

Ensuring stock is on the ground locally enables us to provide a rapid delivery service to meet your demands.

## MANUFACTURING

From our manufacturing facility in Knowsley we produce our entire range of Temporary Fencing, Site Hoarding, Internal Hoarding and Barriers.

## BESPOKE SERVICE

If our range doesn't provide the exact solution to your problem we'll manufacture whatever you need!

## POWDER COATING SERVICE AND CORPORATE COLOURS

Most products are available in your corporate colours.

## REFURBISHMENT SERVICE

If you have an existing fleet of panels or barriers we are able to provide a complete refurbishment service.

## SUPPORT AND ASSISTANCE

We are delighted to assist with site surveys, product suggestions, install, dismantle, relocation and disposal.

# | TEMPORARY FENCING

Our range of temporary fencing products are manufactured completely in-house and are renowned across the UK as some of the most economically viable and quality temporary fencing panels on the market with solutions to accommodate multiple budgets or applications.

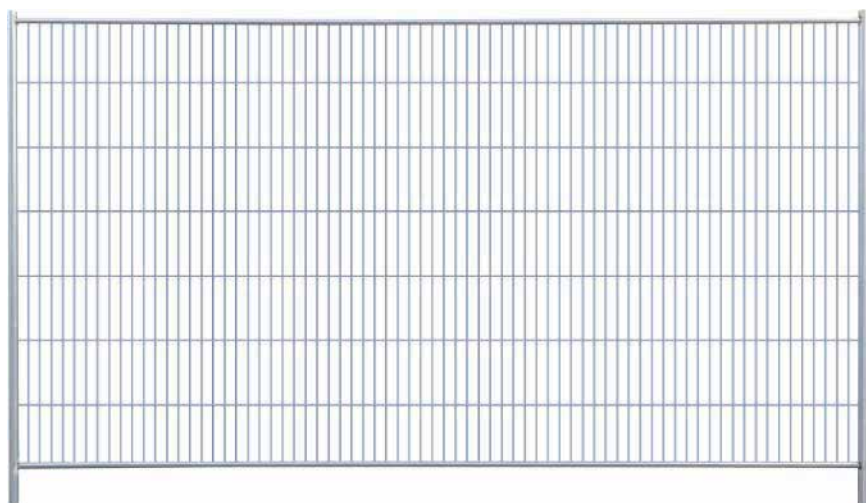

# TEMPORARY FENCE PANELS

## GLADIATOR™

Galvanised HS(G) 151  
Round Top Temporary Fence Panel

Horizontal Tube: 38.1mm  
Vertical Tube: 38.1mm  
Dimensions: 3.5m x 2m  
Reinforced Corners: Yes  
Round Top: Yes  
Finish: Galvanised

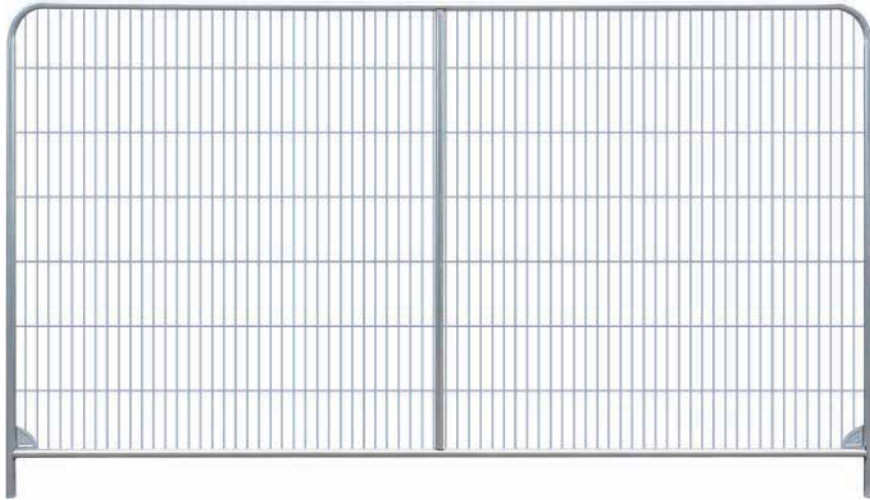

## VECTOR™

Galvanised HS(G) 151 Standard  
Temporary Fence Panel

Horizontal Tube: 25.6mm  
Vertical Tube: 38.1mm  
Dimensions: 3.5m x 2m  
Reinforced Corners: No  
Round Top: No  
Finish: Galvanised

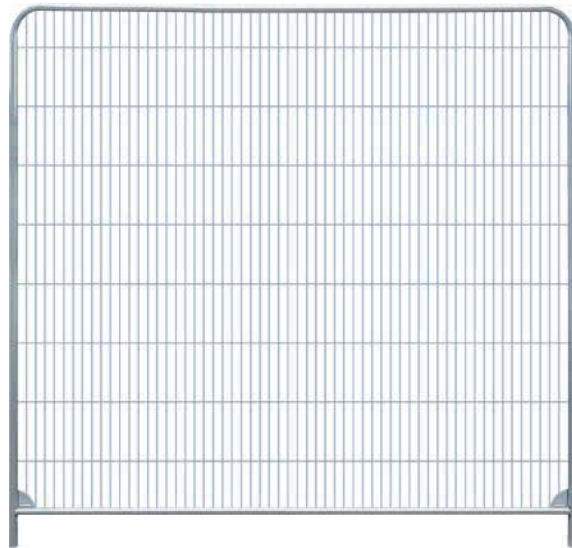

# TEMPORARY FENCE PANELS

## GUARDIAN™

Galvanised HS(G) 151 Heavy Duty Round Top Temporary Fence Panel

Horizontal Tube: 38.1mm  
Vertical Tube: 38.1mm  
Dimensions: 3.5m x 2m  
Reinforced Corners: Yes  
Round Top: Yes  
Finish: Galvanised

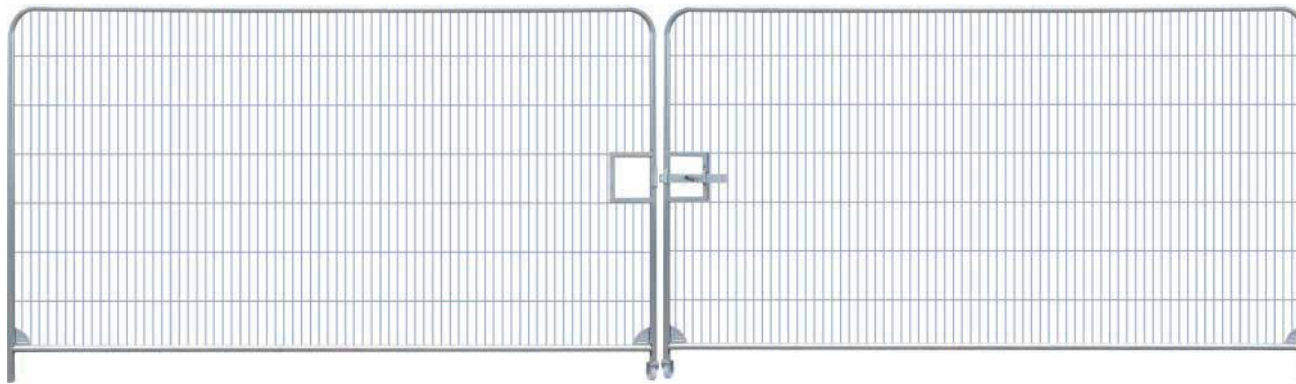

## WARRIOR™

2.4m Temporary Mesh Round Top Fence Panel

Horizontal Tube: 38.1mm  
Vertical Tube: 38.1mm  
Dimensions: 2.5m x 2.4m  
Reinforced Corners: Yes  
Round Top: Yes  
Finish: Galvanised

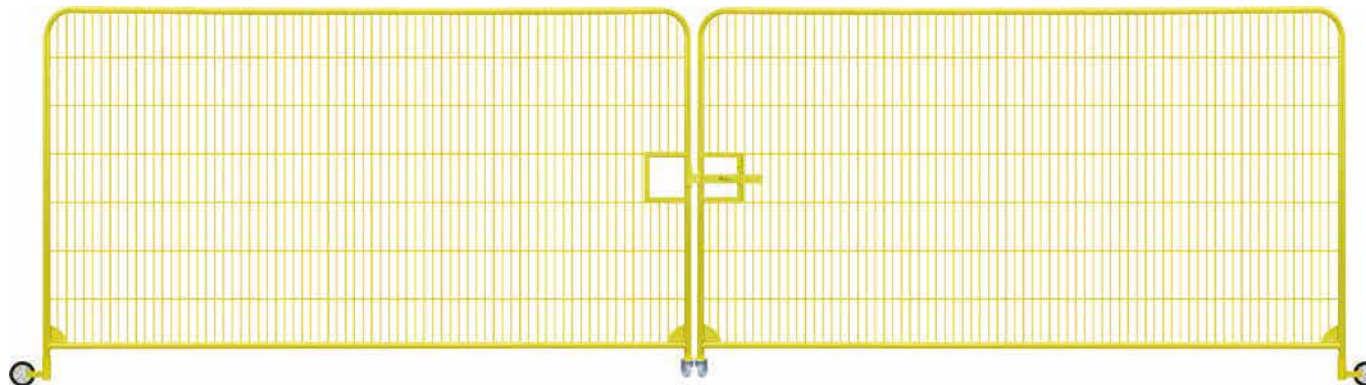

# TEMPORARY FENCE GATES

## 1M PEDESTRIAN GATE IN PANEL

Pedestrian Gate Set Within Temporary Fence Panel

1m pedestrian gate with sliding latch set within a standard fencing panel, making it quick and easy to install a secure access point on site.

## 1M PEDESTRIAN GATE

Temporary Fencing Pedestrian Gate

1m pedestrian gate with sliding latch, compatible with standard fencing panels. Creates a safe access point for site personnel.

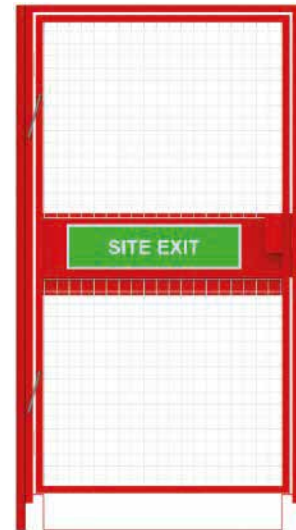

## SITE GANTRY

Site Access Gantry for Fencing Lines

The Site Gantry is a safe access point for the public along a fencing line which also accepts signage to be secured to the frame. Frequently used for events such as festivals as a clear and easy access point to the secured area.

## SECURE ENTRANCE GATE

Digi-Lock Secure Entrance Gate

Entrance gate with secure frame with digi-lock entry system for temporary fencing.

# TEMPORARY FENCE BRACING

## BRACEBLOK™

50kg Plastic Coated Ballast for Temporary Fencing

The BraceBlok™ is a specially moulded ballast solution purpose made for use on runs of temporary fencing significantly increasing safety and stability, especially in windy conditions. Each block weighs 50kg and has been moulded to be stackable for an increased level of support. We recommend that every rubber block is braced with 2 BraceBlocs™ adding 100kg of weight to each bracing position for maximum stability, ensuring a temporary fencing run strong enough to withstand wind speeds of up to 65mph.

Our BraceBlocs™ are ideal for use with either the angled support brace or short brace and are easy to relocate with two people using our purpose built Lifting Tool.

## SOLOBLOK™

20kg Recycled Plastic Ballast for Temporary Fencing

SoloBlok™ is a revolutionary 20kg ballast block designed to add weight and stability to temporary fencing systems, improving wind load capabilities and reducing the likelihood of fallen fencing.

The 20kg weight of SoloBlok™ is suitable for one person lifting, ensuring safer and more practical manual handling as well as increasing installation speeds.

A close relation to our market leading plastic coated 50kg concrete BraceBlok™, the SoloBlok™ is manufactured using 100% recycled plastics from our state of the art in-house recycling facility. SoloBlok™ is designed to be completely recyclable as well as highly robust and reusable, providing a sustainable ballast block product to the industry like no other.

## LIFTING TOOL

Lifting Tool for use on BraceBlok™

BraceBlocs™ weigh in at 50kg each and to move them independently by hand incurs risk of injury. The Lifting Tool is ideal for manually transporting BraceBlocs™ with minimal effort. Two people are required to operate the levers on either side of the tool. The tongs of the lifting tool fit perfectly under the "lip" at the top of BraceBlocs™ for a more secure grip.

The Lifting Tool is also suitable for moving kerbs, edging stones, paving and guttering.

### SHORT BRACE

Short Support Brace for Temporary Fencing

The space-saving option of fence bracing.

### SUPPORT BRACE WITH PEGS

In-Ground Bracing Set for Temporary Fencing

Comes with two pegs

### ANGLED SUPPORT BRACE

Angled Support Brace for Temporary Fencing

A heavy duty brace designed for use with Brace Bloks™ to provide excellent wind-resistance.

### BRACE AND TRAY

On-Ground Bracing Set for Temporary Fencing.

Ballast sold separately

# TEMPORARY FENCE ACCESSORIES

## RUBBER BLOCKS

Blok N Mesh rubber blocks are designed to stabilise temporary fencing and hoarding, preventing them from being blown over in high winds. Our rubber blocks are manufactured from recycled plastics which are reduced in size, checked for contamination, washed, dried and finally fed through our state of the art moulding machinery producing high quality fence feet for temporary fencing systems.

Length: 720mm  
Width: 190mm  
Depth: 120mm

## RUBBER BLOCK STANDARD

Standard Rubber Block for Temporary Fencing

## RUBBER BLOCK (ORANGE)

Orange Rubber Block for Improved Visibility

## HI VIS RUBBER BLOCK

Rubber Block With Hi Vis Ends

The hi vis rubber block is designed to highlight their presence, reducing the risk of trip hazards to the general public or workforce.

## BLOKBAND™

Reflective Bands to Suit Rubber Blocks

Quick and simple to fit, the BlokBand™ provides a hi vis reflective aspect to temporary fencing blocks, improves visibility in lowlight conditions and can be fitted to fencing lines retrospectively with ease!

### STANDARD COUPLER

Coupler for Securing Temporary Fence Panels Together

Steel coupler that provides a positive connection between fence panels to further secure temporary fencing panels from unauthorised access.

### ANTI-TAMPER COUPLER

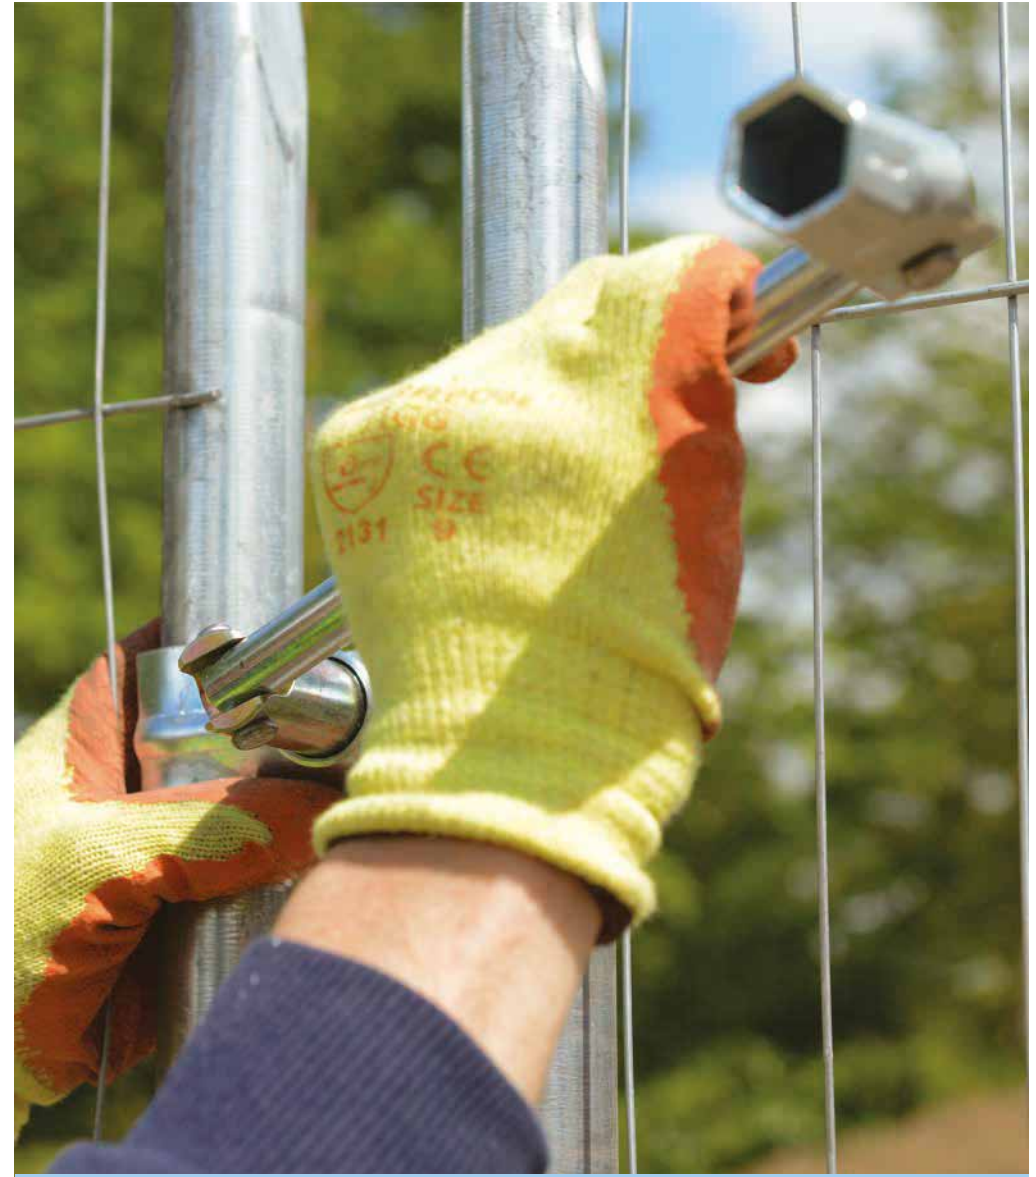

Coupler with Security Nut Fixing

Anti-Tamper Coupler that provides a positive connection between Temporary Fencing Panels with an integral security fixing that requires a specialist tool to fasten/unfasten, preventing unauthorised access/dismantling.

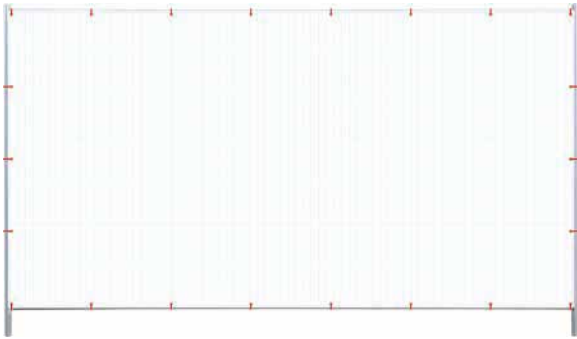

### ANTI-TAMPER SPANNER

Specialist Tool for Installing and Dismantling Anti-Tamper Couplers

# TEMPORARY FENCE ACCESSORIES

## NET MESH TARP

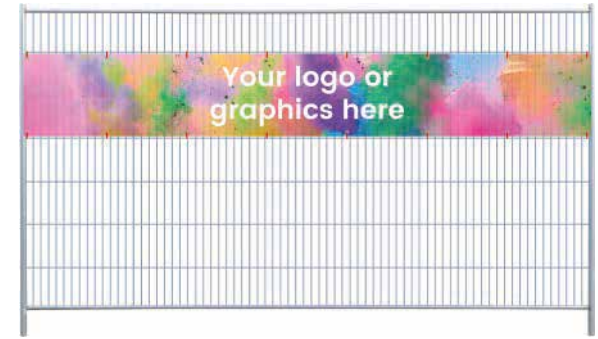

Obscuring Mesh Tarpaulin for Temporary Fence Panels

Available in white, blue or green

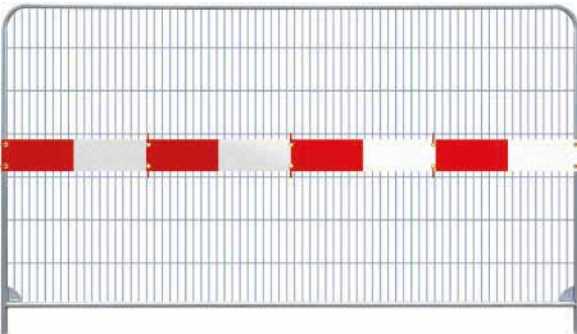

## PRINTED FENCE TARP

Digital Printed Mesh Cover for Temporary Fence Panels

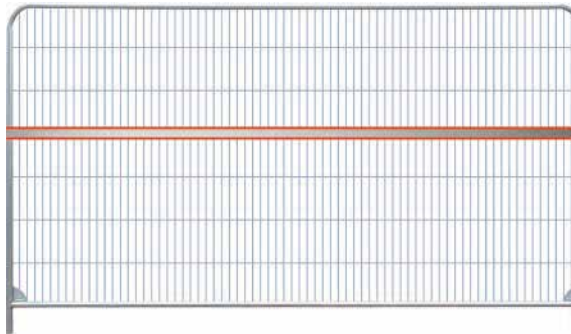

## PRINTED BANNER

Digital Printed Mesh Banner for Temporary Fence Panels

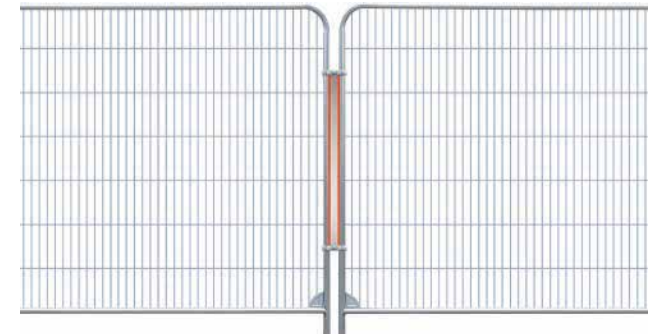

## RED/WHITE REFLECTIVE STRIP

3.5m x 143mm Traffic Management Reflective Strip Temporary Fence Panels

## HI VIS STRIP

High Visibility Strip for Temporary Fence Panels

## LINK STRIP

High Visibility Linking Strips for Temporary Fence Panels

Couplers sold separately

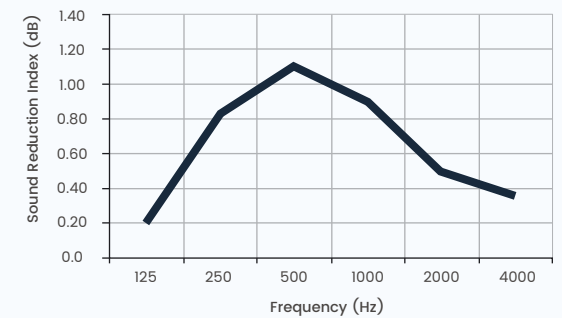

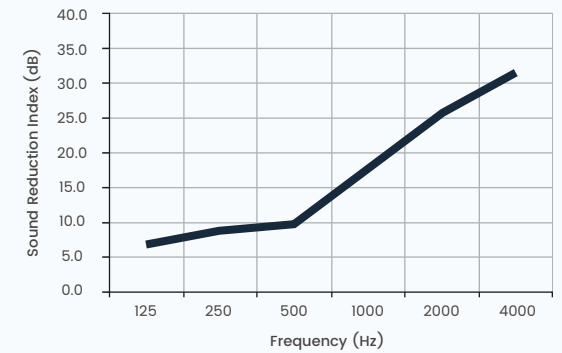

### ACOUSTIC SHIELD™

Acoustic Noise Pollution Shield for Temporary Fencing

Acoustic Shield™ by Blok N Mesh is an Acoustic Barrier for Temporary Fencing panels to reduce noise pollution on construction sites. It provides a cost effective way of reducing noise pollution on site. They are easily transported, quickly fitted, relocated and removed as required.

### ACOUSTIC PERFORMANCE

Acoustic Shield™ provides up to 30dB noise reduction subject to site conditions. Tested in various 'real life' applications in accordance with ISO 1996 - BS4142 - assists with UK Construction Section 61 Notice Applications (Control of Pollution Act 1974). Independently Laboratory Tested To: BS EN ISO 354:2003 and BS EN ISO 10140-2:2010.

# TEMPORARY FENCE ACCESSORIES

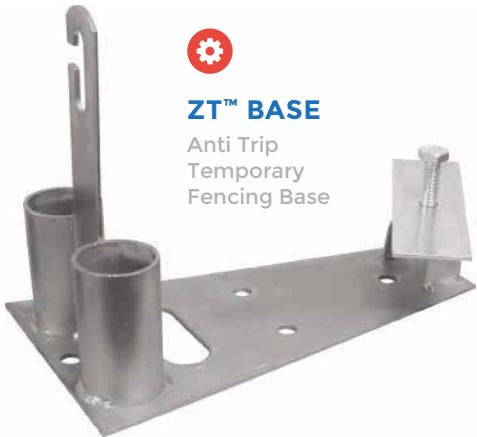

**SPIKE BASE**  
In-Ground Temporary  
Fencing Base

**SPIRAL ANCHOR**  
In-Ground Anchor for  
Securing Temporary  
Fencing to Soft Ground  
Suitable for use with support brace

**ANTI-LIFT DEVICE**  
Anti-Lift Device for  
Temporary Fencing  
Coupler sold separately

**ZT™ BASE**  
Anti Trip  
Temporary  
Fencing Base

**WALL BRACKET**  
Wall Bracket to Mount  
Temporary Fence  
Panels to Walls

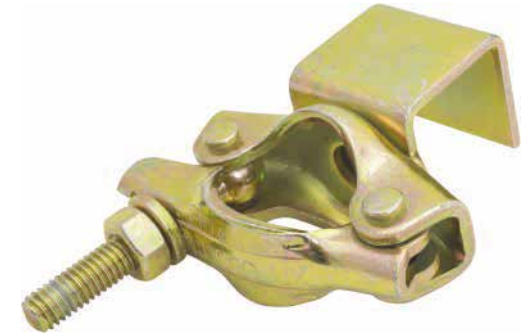

### PADLOCK AND CHAIN

Padlock and Chain  
for Securing Gates

### MESH CLAMP

Mesh Clamp for Securing In-Ground  
Temporary Fencing to Scaffold Poles

### STILLAGE

Stillages for Temporary  
Fencing Panels

Space-saving stillages,  
designed to stack, store  
and transport temporary  
fence panels safely.

# DEFENDER PALADIN FENCING™

Defender Paladin Fencing™ is a temporary fencing solution with the strength of a rigid mesh fence! The 'no-dig' system has profiled Paladin mesh and secure fixings and can be installed using either 50kg BraceBlocs™ or Water Ballast Tank supports. The system is available in 2.4m or 3m heights and can be custom coloured to any BS / RAL colour reference to suit your company branding. Boasting zero trip hazards on the pedestrian facing side of the system, Defender Paladin Fencing™ provides a robust, safe and practical solution to any site.

# DEFENDER PALADIN FENCING™

## DEFENDER PALADIN FENCING™

The Defender Paladin Fencing™ system is a revolutionary temporary fencing solution with the strength of a rigid mesh fence

The 'no-dig' system has profiled Paladin mesh and secure fixings and can be installed using either 50kg BraceBloks™ or Water Ballast Tank supports. The system is available in 2.4m or 3m heights and can be custom coloured to any BS / RAL colour reference to suit your company branding.

The system provides all the benefits of temporary fencing with the strength of traditional Paladin fencing, and comes with full site-specific wind loading calculations provided as standard.

Boasting zero trip hazards on the pedestrian facing side of the system, Defender Paladin Fencing™ provides a robust, safe and practical solution to any site.

## ✓ INNOVATIVE PRODUCT FROM BLOK N MESH

### No-dig Installation

Ideal for use in areas where the risks of service strikes are high

### Multiple Height Options

Available in either 2.4m or 3m height options

### No Fence Gaps

No gaps between fence panels for better security and strength

### Multiple Ballast Options

Compatible with 50kg BraceBloks™ or Water Ballast Tank supports

# | POLMIL® FENCING

POLMIL® is a unique security fencing system innovated exclusively by Blok N Mesh. POLMIL® was developed to provide a relocatable, on-ground, durable fencing system avoiding the need to undertake risky and expensive excavation to install more permanent in-ground fencing systems. It has been used to protect some of the world's most prestigious and security-sensitive events and in doing so established itself as one of the market's most renowned systems of counter terror fencing.

## THE POLMIL® STORY

The unique POLMIL® range of counter terror fencing was originally designed to meet stringent security requirements for the many varied London 2012 Olympic venues and was also selected to protect the Glasgow 2014 Commonwealth Games.

Over and above the real-life experience of successful multiple deployments at London 2012 and the Glasgow Commonwealth Games, specific independent testing has included long-term installation in harsh weather environments to confirm micro-phonic PIDS suitability, specialist forces attack, hostile vehicle ramming and coordinated 'mob' attack testing with excellent results.

POLMIL® fencing is now widely deployed at Government establishments, nuclear facilities, Royal Navy docks, National Grid substations, airports, gas works, mining operations and other security sensitive sites throughout the world.

POLMIL® systems are available for hire or purchase direct from the manufacturer.

**Visit the website**  
**[www.polmilfence.com](http://www.polmilfence.com)**

Standard systems are 2.4m or 3m high

A range of doors and gates

### Less Risk

Avoid risk of damage to underground services and possible exposure of below surface environmental hazards.

### Cost Reduction

Reduced number of administrative processes, meetings and expert assessments necessary before installation, no disposal of spoil required, speed of installation.

### Flexible & Sustainable

POLMIL® design enables installation on all surface types and levels. The reusable components are fully recyclable

Water ballast option available

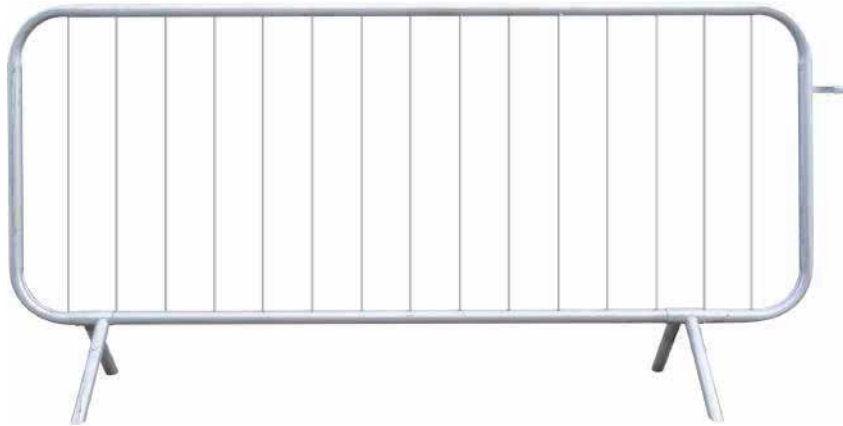

# | METAL BARRIERS

Our range of metal barriers are mostly manufactured in-house and include a variety of solutions, ideal for crowd control and providing safe passageway for the general public during construction or events. Metal barriers are available to be powder coated in your company colours.

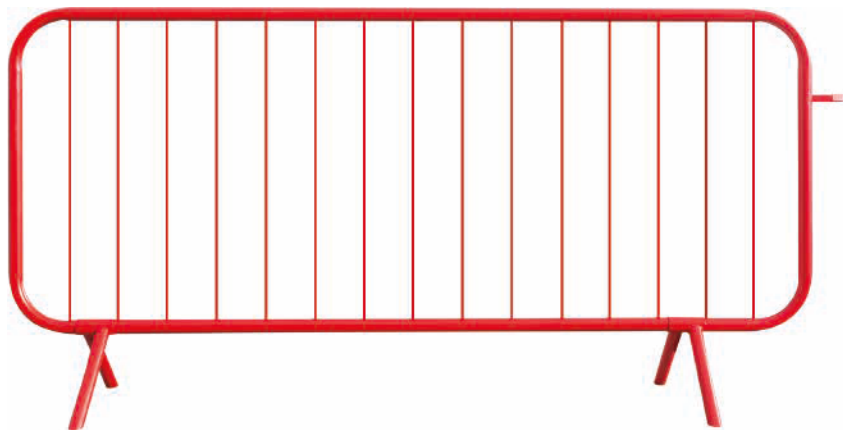

# METAL BARRIERS

## BAR BARRIER

2.3m x 1.1m Low Level Pedestrian Bar Barrier with Fixed Feet

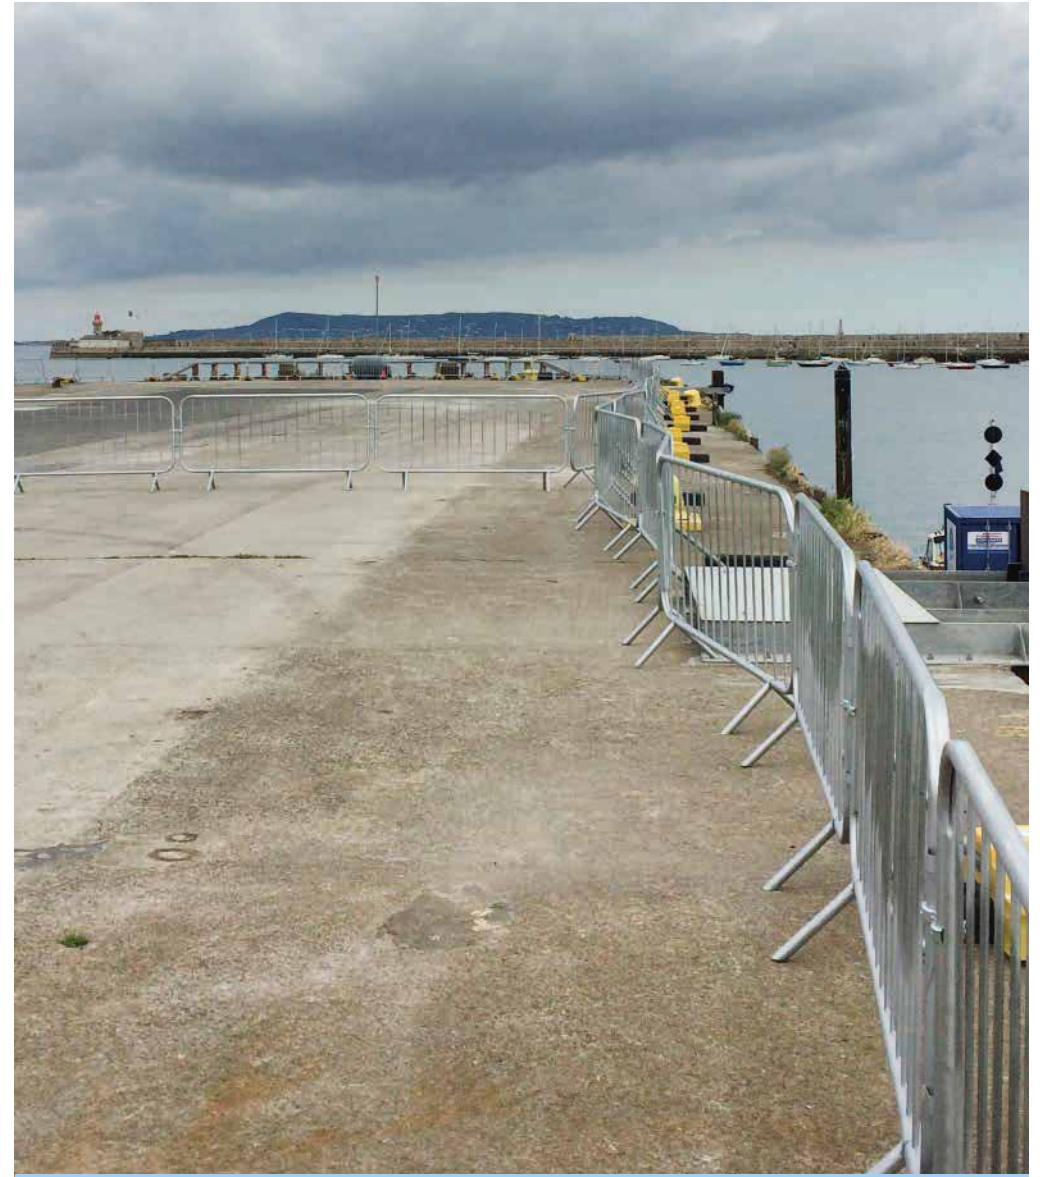

Powder coating in your corporate colour available on request

## RED BAR BARRIER

2.3m x 1.1m Low Level Pedestrian Bar Barrier with Fixed Feet

and Red Powder Coating

Manufactured In-House

## WHITE BAR BARRIER

2.3m x 1.1m Low Level Pedestrian Bar Barrier with Fixed Feet and White Powder Coating

## CROSSING POINT BARRIER C/W FIXED FEET & SPRING LOADED GATE

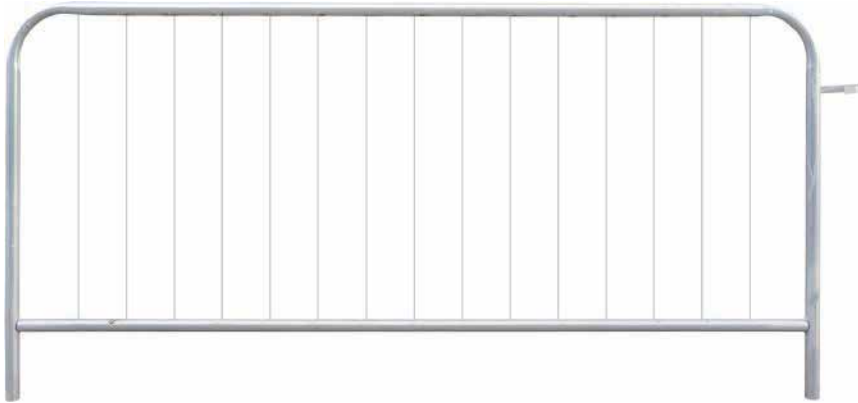

2.1m x 2.3m Crossing Point Barrier

Crossing Point Barrier is used to identify a safe crossing point on a run of pedestrian barriers. Comes with fixed feet and spring loaded gate. Opening 1m.

Metal Feet or Rubber Blocks required when used in a run (sold separately)

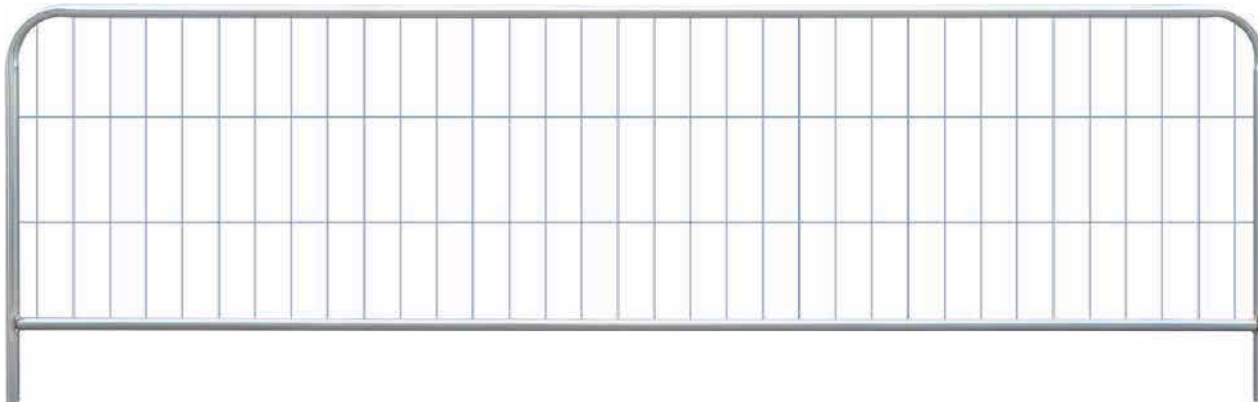

**HAWK BARRIER™**  

2.3m x 1.1m Low Level Pedestrian Barrier

Requires Metal Feet or Rubber Blocks (sold separately)  
Powder coating in your corporate colours available on request

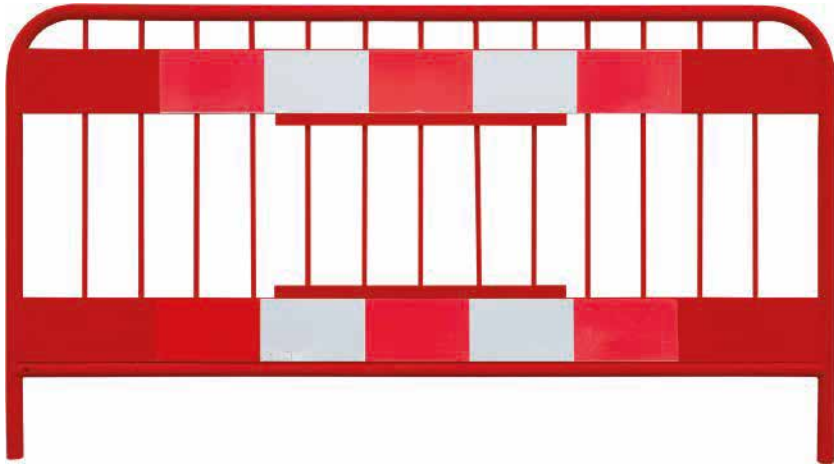

**MESH BARRIER**   

3.5m x 1.1m Low Level Pedestrian Barrier

Requires Metal Feet, Rubber Blocks or Slot Blok Barriers (sold separately).  
Powder coating in your corporate colours available on request

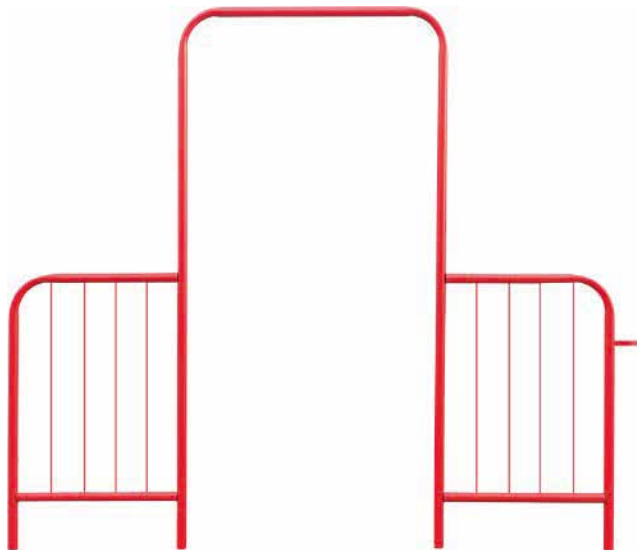

## UTILITY BARRIER

2m x 1.1m Heavy Duty Barrier

Requires Metal Feet (sold separately)

## CROSSING POINT BARRIER

2.1m x 2.3m Crossing Point Barrier

Crossing Point Barrier is used to identify a safe crossing point on a run of pedestrian barriers. Opening 1m.

Metal Feet or Rubber Blocks required (sold separately)

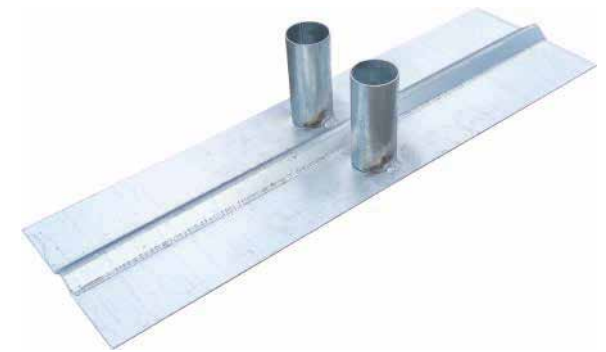

### SINGLE METAL BASE

Pedestrian Barrier Single Foot

Used on metal barriers without fixed feet

### DOUBLE METAL BASE

Pedestrian Barrier Double Foot

Used on metal barriers without fixed feet

# | PLASTIC BARRIERS

Plastic barriers provide a safe low level segregation between working areas and safe pedestrian passageways, guiding foot traffic away from hazardous areas. They are ideal for use on construction sites, roadworks and events requiring crowd control.

## CHAPTER 8 BARRIER

2m HDPE Pedestrian Safety Barrier

Dimensions: 2m x 1m

Branding: Yes

Recyclable: Yes

Material: HDPE

## CHAPTER 8 BARRIER C/W ANTI-TRIP FEET

2m HDPE Pedestrian Safety  
Barrier With Anti-Trip Feet

Anti-trip feet with space saving design, reducing the likelihood of accidents caused by trip hazards, ideal for situations where there is a high frequency of foot traffic such as pavements.

-  Made from high density polyethylene
-  Standard or anti trip feet available
-  Stackable for easy transportation
-  Ideal for construction or street works
-  Strong and secure design
-  Linkable
-  100% recyclable
-  Branding and bespoke colours available

## JSP TITAN BARRIER

Robust, Stackable Pedestrian Barrier by JSP

Dimensions: 2m x 1m  
Branding: Yes  
Recyclable: Yes  
Material: HDPE

## JSP TITAN BARRIER C/W ANTI-TRIP FEET

Robust, Stackable Pedestrian Barrier by JSP with Anti-Trip Feet

Dimensions: 2m x 1m  
Branding: Yes  
Recyclable: Yes  
Material: HDPE

Titan is the recognised and well established stacking barrier from JSP. It has all the usual advantages of standard stackable systems, but in addition has many unique features. Easy to use, assemble and store.

The Titan has undergone extensive testing: Sub-zero impact testing; Accelerated UV age testing. Dual colour coded systems for contractors' corporate ID. Flexible toggles allow courtesy boards to be attached to barrier.

### AVALON BARRIER

2m x1m Chapter 8 HDPE Plastic Barrier

Blow moulded 1 piece barrier constructed from high density polythene. Ideal for event management and pedestrian control. Linkable Barrier available with Anti-trip feet on request. Designed for secure stacking and easy transportation. Recycled and 100% recyclable.

### WORKGATE 4

Barrier for Contractors

Each gate has a Chapter 8 reflective top panel, linked together with black clip-on hinges. Easily folds for quick deployment and lightweight for storage and handling. Metal free. Locating holes enable courtesy or pedestrian signs to be fitted. Large area to allow contractor branding/details to be applied.

Colours available: Blue, Red, Yellow

# | BLOCKADE™ HOARDING

Blockade™ is our most popular and versatile hoarding system, available as an on-ground or in-ground system in either galvanised steel or UPVC materials. With a wide range of accessories it is easy to add extra privacy and security features to a Blockade™ hoarding system.

# BLOCKADE™ HOARDING

## BLOCKADE™ HOARDING SYSTEM

Blockade™ is available as an in-ground system for extra stability against high winds or as an on-ground system avoiding service strikes and simplifying the installation process. It is also available with a wide variety of accessories to suit multiple site applications such as half mesh panels, ground skirts, mesh extensions, privacy infills and more.

Blockade™ can be manufactured in either flat facing UPVC or profiled steel to suit various applications.

All Blockade™ hoarding systems are available with purpose-built vehicle gates and pedestrian doors which are simple to install, providing secure points of access to the site.

Blockade™ steel can be powder coated in your corporate colours creating a more professional looking site perimeter in keeping with your brand. Powder coating can be done in any BS / RAL colour.

## THE UK'S MOST POPULAR 2M HOARDING SYSTEM

### Economical

Blockade™ is an extremely cost-effective hoarding system

### Flat UPVC or Profiled Steel

To suit site requirements

### In-Ground or On-Ground

Bracing options to suit a variety of site requirements

### Pedestrian Doors & Vehicle Gates

# | FORTRESS™ HOARDING

Fortress™ Hoarding is our premium in-ground steel hoarding system with high security and excellent value through multiple re-use. Fortress™ is manufactured from heavy duty steel sheets with accessories including pedestrian doors and vehicle gates.

# FORTRESS™ HOARDING

## FORTRESS™ HOARDING SYSTEM

Fortress™ is a premium 2.4m in-ground steel hoarding system designed for multiple re-use. The simple panel, post & clamp system makes it easy to install, dismantle and re-erect.

Fortress™ is manufactured from heavy duty profiled steel for maximum strength, ensuring a more robust perimeter hoarding. It is available with purpose-built vehicle gates and pedestrian doors with locking options, providing a secure and professional point of access to the site.

Fortress™ can be powder coated in your corporate colours creating a more professional looking site perimeter in keeping with your brand. Powder coating can be done in any BS / RAL colour.

## 2.4M SITE COMPOUND IN-GROUND HOARDING SYSTEM

### In-Ground

Reusable in-ground steel posts for strength and stability

### Pedestrian Doors & Vehicle Gates

Options for a variety of purpose-built site access points

### Extremely Robust

Manufactured from heavy duty steel for extra strength

### Manufactured In-House

Designed and developed exclusively by Blok N Mesh

# | SAFE HOARD™

Safe Hoard™ is a 'no-dig' 2.4m high steel hoarding system for sites where additional security is required without the need for ground excavation. Safe Hoard™ is manufactured with heavy duty profiled steel panels with accessories including pedestrian doors and vehicle gates.

## SAFE HOARD™ HOARDING SYSTEM

Safe Hoard™ has an intelligent 'no-dig' design which means the 2.4m steel hoarding system is ideal for use in areas where the risk of service strikes are high; car parks, pavements, etc.

Safe Hoard™ is manufactured from heavy duty profiled steel for maximum strength, ensuring a more robust perimeter hoarding and is available with purpose-built vehicle gates and pedestrian doors with locking options, providing a secure and professional point of access to the site.

Safe Hoard™ is braced using the exclusive 750kg Safe-Blok™ ballast blocks by Blok N Mesh, which are easily transported on site via forklift, using their purpose-built fork inserts.

Safe Hoard™ can be powder coated in your corporate colours creating a more professional looking site perimeter in keeping with your brand. Powder coating can be done in any BS / RAL colour.

Now with  
forklift pockets

## 2.4M NO-DIG STEEL HOARDING

### No-dig Installation

Ideal for use in areas where the risks of service strikes are high

### Pedestrian Doors & Vehicle Gates

Options for a variety of purpose-built site access points

### Extremely Robust

Manufactured from heavy duty steel for extra strength

### Manufactured In-House

Designed and developed exclusively by Blok N Mesh

# | SECURE HOARD™

Secure Hoard™ is a premium 'no-dig' 2.4m high steel hoarding system which has been approved by Network Rail. The system has been designed for quick and easy installation and the heavy-duty flat faced steel panels are ideal for adding graphics and signage.

BUILDING ENTRANCE  
THIS WAY

## THE WATER JUMP

Fence 16, Grand National, Aintree

At just 0.8m (2'6") in height, it's a fairly small jump but the 3m (almost 10ft) water jump on the landing side makes up for that - giving an overall spread of 3.8m (12'6"). Just like The Chair it's only jumped once in the Grand National. In the very early Nationals it was a stone wall.

## SECURE HOARD™ HOARDING SYSTEM

Secure Hoard™ is a 2.4m steel hoarding system designed and developed to meet the stringent requirements set by Network Rail for hoardings used on their locations during temporary works. The Secure Hoard 'no-dig' system has been used in many railway stations across the UK and Ireland. The system is also completely flat faced, the ideal environment for attaching hoarding graphics and safety signage.

Secure Hoard™ is manufactured from heavy duty flat steel for maximum strength, ensuring a very robust perimeter hoarding and is available with purpose-built vehicle gates and pedestrian doors with locking options, providing a secure and professional point of access to the site.

Secure Hoard™ is secured using the exclusive 750kg Safe-Blok™ kentledge blocks by Blok N Mesh, which are easily transported on site via forklift, using their purpose-built fork inserts.

Secure Hoard™ can be powder-coated in your corporate colours creating a more professional looking site perimeter in keeping with your brand. Powder coating can be done in any BS / RAL colour.

## Network Rail NETWORK RAIL APPROVED HOARDING SYSTEM

### Network Rail Approved

Adheres to stringent rules set by Network Rail for temporary works

### On-Ground

Avoids risky site excavation and likelihood of service strikes

### Extremely Robust

Manufactured from heavy duty steel for extra strength

### Manufactured In-House

Designed and developed exclusively by Blok N Mesh

# | GO-HOARD™

Go-Hoard™ provides a durable and sustainable option for external hoarding. The panels are 100% recyclable. The flat finish is ready to accept vinyl graphics and can also be supplied in corporate colours.

## GO-HOARD™ HOARDING SYSTEM

Go-Hoard™ is a revolutionary eco-friendly 2.4m high PVC hoarding system made from 50% recycled plastics, offering a more sustainable and 'green' solution compared to traditional methods of timber hoarding. Go Hoard™ boards provide a completely flat faced finish and are 100% recyclable.

The system uses a scaffold framework for durability and maximum reuse, and can be installed with 'no-dig' kentledge blocks or with 'in-ground' reusable sleeved scaffold posts.

Go-Hoard™ panels are supplied in a basic white finish but can be painted in corporate colours creating a professional looking site perimeter in keeping with your brand.

## ENVIRONMENTALLY FRIENDLY PVC HOARDING

### Made from Recycled Materials

Panels are manufactured from 50% recycled plastics

### Recyclable

The PVC panels are 100% recyclable

### Flat Faced System

Ideal environment for adding hoarding graphics or signage

### In-Ground or On-Ground

Bracing options to suit a variety of site requirements

### Vehicle Gates

Purpose-built site access vehicle gates are available

### Manufactured In-House

Designed and developed exclusively by Blok N Mesh

# | REUSE-A-WALL™

Reuse-A-Wall™ is an innovative modular internal hoarding system which can be manufactured bespoke to your exact height, length and design. It has been developed to provide a cost effective, safe and reusable hoarding system for internal works such as shop fitting, refurbishment and fit out projects.

Looking for  
a  
**job?**

This development  
will create 500 new  
permanent positions.

WOOOOOOO  
OOOOOOOO

We know  
We made that noise too.

your kind of shopping

Take a  
**sneaky  
peek**

Cool huh?

## REUSE-A-WALL™

Reuse-A-Wall™ is a modular PVC hoarding system devised to suit internal works such as refurbishment, remodelling and shop fitting. Reuse-A-Wall™ is manufactured in-house from 85% recycled UPVC ensuring fantastic environmentally friendly properties.

Reuse-A-Wall™ can often be found in a variety of buildings, but is most frequently used in supermarkets, hospitals, airports, shopping centres, train stations and leisure centres.

Reuse-A-Wall™ has been developed with trip prevention in mind, ensuring that there are no protruding features on the pedestrian side, maximising safety of the general public and mitigating the likelihood of legal action from avoidable accidents.

With a flat surface, Reuse-A-Wall™ is also ideal for adding signage and hoarding graphics to utilise internal works as an advertising opportunity. Despite its strength, Reuse-A-Wall™ panels are exceptionally light and easy to handle, making transportation and installation quick and easy.

# | CRANE GUARD™

Tower cranes have been targeted by thrill seekers in recent years, pursuing dangerous activities such as base jumping and roof-topping, risking serious injury or fatality. Crane Guard™ is a unique solution designed solely for the prevention of unauthorised access to tower cranes.

## CRANE GUARD™ SYSTEM

Crane Guard™ from Blok 'N' Mesh utilises components from the POLMIL® security fence system; which incorporates anti-climb 358 Prison Mesh and a secure pedestrian door permitting authorised entry only, ensuring that tower cranes are significantly less accessible to trespassers and thrill seekers such as “rooftoppers”.

### WHAT IS ROOFTOPPING?

As public interest and popularity is ever increasing for activities such as 'Base Jumping' and so called 'Rooftopping'; construction sites and more specifically the complex structures within, such as Cranes, are targeted by thrill seekers who want to publicly showcase themselves or their cause by scaling challenging and life-threatening structures.

Feats such as these put the individual's health at risk and produces negative PR for the construction company due to lack of site security. In recent years, this phenomenon has caused several highly publicised deaths from individuals taking great risks whilst scaling complex structures.

## EXCLUSIVE PRODUCT FROM BLOK N MESH

### Utilises "Prison-grade" Mesh

Features 358 prison mesh; very difficult to climb or damage

### Secure Pedestrian Access

Integrated pedestrian door with secure digi-lock access

### Anti-climb "Needle-top"

Protruding vertical mesh makes it significantly harder to scale

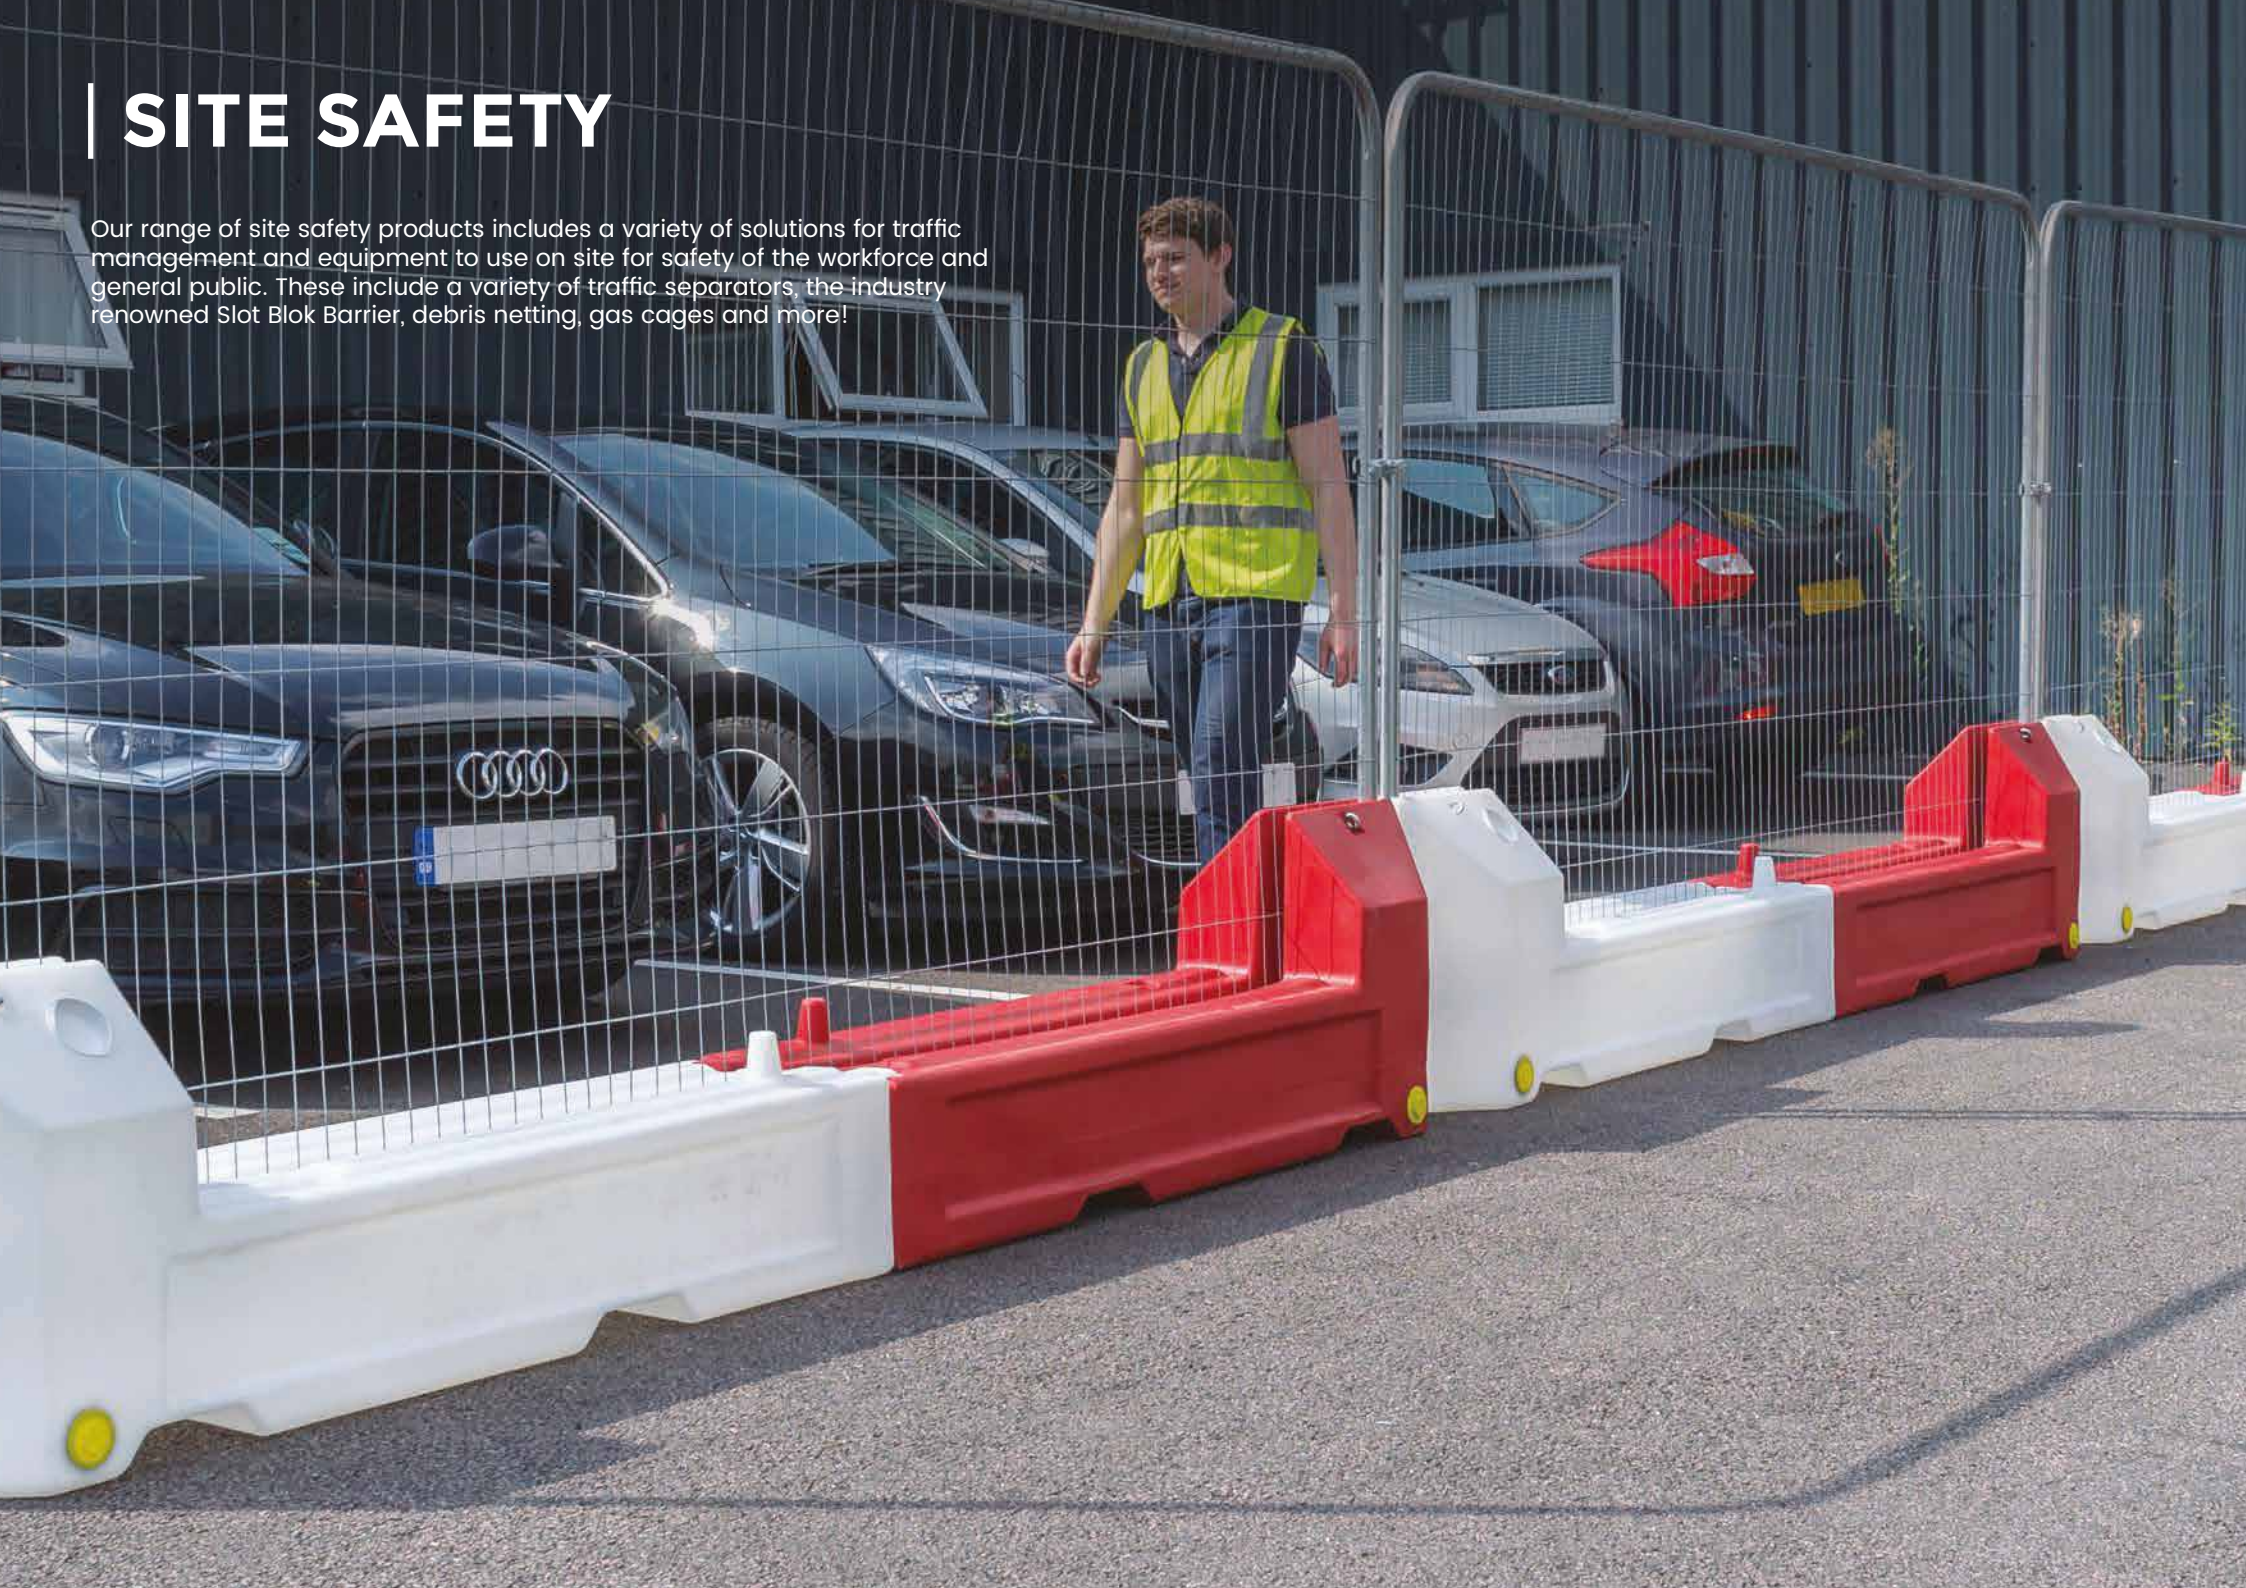

### Deters Trespassing

Mitigates the likelihood of trespassing and vandalism

# | SITE SAFETY

Our range of site safety products includes a variety of solutions for traffic management and equipment to use on site for safety of the workforce and general public. These include a variety of traffic separators, the industry renowned Slot Blok Barrier, debris netting, gas cages and more!

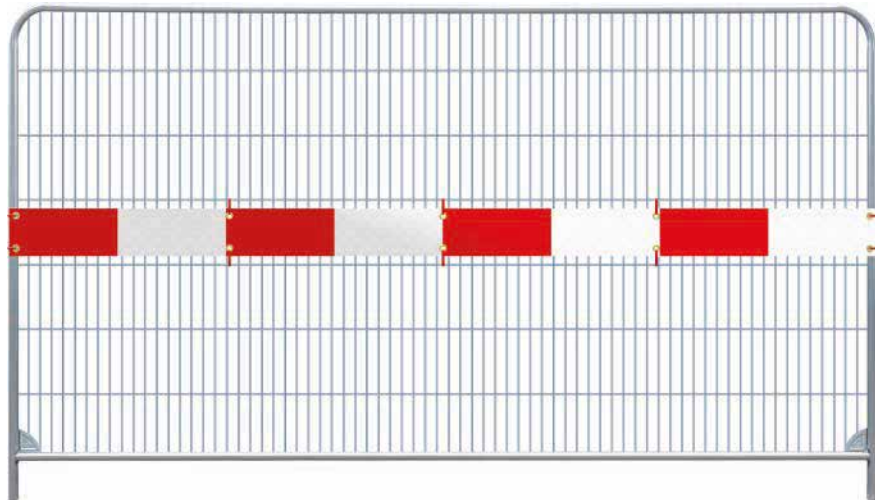

## SLOT BLOK™ BARRIER

Water Filled Traffic Barriers

The only water filled barrier to fit an Industry standard 3.5 x 2m mesh panel. Eliminates trip hazards for pedestrians and workforce. Tested to withstand winds up to 57mph. Rotates 45 Degrees. 50mm Drainage point for easy emptying and 76mm point for easy fill.

Panel sold separately

## RED/WHITE REFLECTIVE STRIP

3.5m x 143mm Traffic Management Reflective Strip Temporary Fence Panels

Panel sold separately

# TRAFFIC MANAGEMENT

## TRAFFIC SEPARATOR - 1M

Red and White Water Filled Traffic Separators

Can be water filled or for a more permanent requirement sand filled. Designed to create a solid wall leaving no gaps between each barrier. 1000mm (L) x 400mm (W) x 550mm (H).

## POST AND PLANK TO SUIT TRAFFIC SEPARATOR

Additional high visibility post and board designed for use with evo barrier system only

## BISON BARRIER

Flat Steel Road Plates Available in Plain or Painted. 8ft x 4ft x 3/4"

## RESIN ROAD PLATES

Resin Coated Road Plates for Excellent Skid Resistance. 8ft x 4ft x 3/4"

## MANUFACTURING

Most of our product range is manufactured entirely in house from our factories in Knowsley and Kildare. Collectively we manufacture in excess of 1,000,000 temporary fence panels per year alone, as well as hundreds of thousands of other product styles.

We have manufactured some of the nation's most innovative solutions in temporary fencing, pedestrian barriers and site hoarding, often surpassing the expectations of our customers in our supply ability and creative products.

As a customer of Blok N Mesh, you can be safe in the knowledge that you are buying direct from the manufacturer with a wealth of knowledge and experience, completely cutting the cost of purchasing from intermediaries.

## BESPOKE DESIGN

As the manufacturers of most of our product range, it gives us the unique ability to alter the design of our products to suit the needs of our customers. This may include various locking mechanisms on vehicle gates or pedestrian gates, different types of mesh or adding rails to barriers.

If you require a design alteration to be made to a product within our range, don't hesitate to enquire as we may be able to provide you with a cost effective and innovative solution to the problem.

Please note that bespoke design may incur minimum order quantities dependent on the complexity of the requested alterations.

## CUSTOMISED PRODUCTS

Many of our products can be customised to include your company branding in one way or another. Our range of products with custom branding includes full colour digital printed mesh tarpaulins and banners to suit temporary fence panels, ideal for advertising a building site or local event. It also includes rubber blocks which can be painted in any BS or RAL colour to suit your corporate branding.

Hoarding panels can also be powder coated in your corporate colours using our in-house state of the art powder coating machinery. Take us up on our free artwork service – we're happy to provide mock-ups so you can see what the end product will look like!

## IN-HOUSE POWDER COATING

Powder coating is available on all metal products and commonly used on galvanised hoarding systems manufactured in-house by Blok N Mesh.

Powder coating is the process where fencing panels, barriers, site hoarding or accessories are covered with a coloured polyester or epoxy powder which is then heated into a protective layer, providing a professional appearance to the products of your choosing, branded to suit your corporate guidelines.

## IN-HOUSE TRANSPORT

We can deliver our wide range of products nationwide using our in-house transport fleet of over 70 vehicles, to which we are accredited as an organisation receiving prestigious transport certifications such as FORS Silver, The Freight Transport Association and CLOCS Champion.

We pride ourselves on being able to provide flexible delivery slots to suit your requirements. All depots are equipped with a variety of delivery vehicles including 18ton rigid vehicles fitted with cranes ensuring rapid fulfilment regardless of order size.

Blok N Mesh are the United Kingdom's leading manufacturer and supplier of temporary fencing, barriers and hoarding products. Supplying the construction and allied industries worldwide for over 30 years, Blok N Mesh are dedicated to the supply of top quality products and a market leading service to all sectors of the industry.

Blok N Mesh can supply a complete range of steel hoarding, temporary fencing and demarcation / pedestrian barriers manufactured, delivered, installed, dismantled and relocated nationwide. To find your nearest local depot, check our list of locations throughout the United Kingdom and Ireland on the next page.
